

How Data Helps Get Better Outcomes for Service Members and Veterans

June 8
2:00 – 3:00PM EDT

#AOSExploresData
#AOSEmpowersThroughData

REGISTER

In today's push for outcomes and return on investment, using data plays a critical role. Those engaged in policy, planning and service delivery are finding that data is vital to successfully doing their job. Using data tangibly improves our ability to meet the real needs of service members, veterans and their families.

Join this **FREE national web event** as we explore the value of using data to improve planning, outreach, resource development, partnerships and outcomes. Space is limited!

Participants will explore:

- Real-world examples of effective practices in collecting and using data
- Strategies and best practices from practitioners and leaders who have improved outcomes for veterans and service members, in part, by focusing on key data elements
- Practical tools that can be used in your own local and state efforts
