

## Telehealth Increases Access to Care for Today's Military

September 30  
2:00 – 3:00PM EST

[REGISTER](#)

#AOSExploresTelehealth

The evolution of technology has paved the way for innovation in delivering high-quality, accessible health care services to Service members, their Families and Veterans. Through **video conferencing, mobile applications, interactive media** and more, today's Military may receive 24/7 advanced support and unparalleled services from virtually anywhere in the world.

Join this **FREE national web event** as we explore these innovative technologies and discuss cutting-edge research and access to the behavioral health tools and critical support systems. **Space is limited!**

### Participants will discuss:

- The National Center for Telehealth & Technology's (T2) research and outreach programs
- The benefits of mobile health for the Military population
- Telehealth resources such as websites and mobile applications
- Ethics behind utilizing telehealth and technology

### Did You Know?

690,000 U.S. Veterans received care via telehealth in the 2014 fiscal year.

—The US Department of Veterans Affairs
